

Takashi Ohtsuki Ph.D.

Associate Professor

Department of Medical and Bioengineering Science,
Okayama University, Japan.

Education & Experience

1993 B.S. Tokyo Institute of Technology, Japan

1998 Ph.D. Department of Chemistry and Biotechnology, University of Tokyo

1998-1998 Postdoctoral Associate

Department of Chemistry and Biotechnology, University of Tokyo

1999-2000 Research Associate

RIKEN Institute, Japan

2000-2003 Assistant Professor

Department of Chemistry and Biotechnology, University of Tokyo

2003-2007 Senior Assistant Professor

Department of Biochemistry and Biotechnology, Okayama University

2007-present Associate Professor

Department of Medical and Bioengineering Science, Okayama University

Research interests

- RNA science and RNA engineering.
- RNA interference
- Protein biosynthesis system.
- Expansion of protein biosynthesis system using nonnatural amino acids.
