

Dr Cheng Zhi HUANG, analytical chemistry and pharmaceutical analysis professor of Southwest University, Chongqing PRC. He was graduated from Southwest Normal University in 1986 with a Bachelor degree. After having worked there for 4 years, he got into Beijing Normal University for Master degree in Analytical Chemistry, and Peking University for Ph D degree of Analytical Chemistry. In 1998, he went to the research group of Dr Hideki Kambara in the Central Research Laboratory of Hitachi Ltd. as a Hivips for one year. After that, he backed to Southwest Normal University. In 2000, he went to the group of Dr Johne Liu in University of Ottawa as a short-term postdoctoral fellowship. In 2001, he went to Japan again and stayed in the research group of Professor Imai in University of Tokyo for two years as a postdoctoral fellowship supported by the Tokyo Biochemical Society. After that, he backed China and now is a professor and the Chairman of the Southwest University College of Pharmaceutical Sciences. He has published more than 150 papers and has 4 patents. His research fields now include the D-amino acids analysis, bioassembly, and nanoanalytical chemistry.
